

Rocky Mount Academy is seeking a high school Science (Chemistry, AP Chemistry, etc) teacher to join our team. As a Science Teacher, you will be responsible for planning and delivering engaging and effective lessons to students in grades 9-12, fostering their understanding of scientific concepts and encouraging their curiosity and passion for the subject.

Key Responsibilities:

1. Plan and deliver high-quality, standards-based science lessons to high school students
2. Create a positive classroom environment that encourages student participation and engagement
3. Use a variety of teaching strategies and resources to meet the diverse learning needs of all students
4. Assess student understanding and progress regularly and provide feedback and support to help students improve
5. Stay current with developments in the field of science education and incorporate relevant technology and resources into teaching

Requirements:

1. Bachelor's degree in related science field with successful previous experience
2. Strong knowledge of science standards and curriculum
3. Excellent communication and interpersonal skills
4. Ability to work collaboratively with colleagues and stakeholders

Please email resume to Timmy Tucker, Head of Upper School:
